Opening Statement

This report details the findings and analysis of bugs identified on the Crazyline fashion website [URL: <https://www.crazyline.com/>]. Crazyline is a well-established fashion retailer specializing in a wide range of women's apparel, accessories, and seasonal collections. The website serves as a critical platform for customers to browse, purchase, and stay updated on the latest trends and promotions offered by Crazyline .

Purpose

The purpose of this report is to document and evaluate specific issues observed during testing, with a focus on ensuring a seamless, reliable, and user-friendly shopping experience. Identified bugs may impact user experience, site functionality, or eCommerce capabilities, directly influencing customer satisfaction and the company's business objectives.

Website Overview

Crazyline's website provides various features and functionalities designed to support online retail operations, including "Buy the Look" pages, product galleries, social media integrations, account registration, and a checkout process. These functionalities require stable, efficient, and integrated operation to allow customers to engage with the brand and complete purchases successfully.

Testing approach

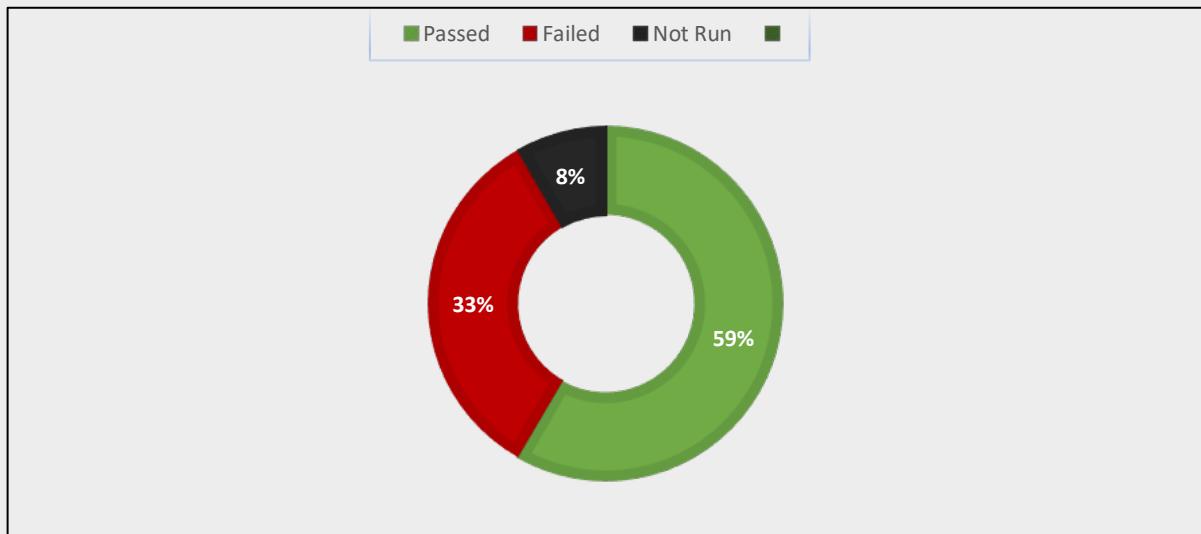

The testing approach for the Crazyline eCommerce website focused on four key areas: Smoke Testing, Interface Testing, UX/UI Evaluation, and Compatibility Testing. Smoke testing ensured that critical functionalities, such as login, checkout, and product display, were stable and operational. Interface testing was conducted to validate seamless integration between internal modules and third-party components, including social login and payment gateways. UX/UI testing assessed the website's user-friendliness, design consistency, and responsiveness, prioritizing ease of navigation and overall customer experience. Finally, compatibility testing verified the website's performance across various devices, browsers, and operating systems, ensuring a consistent experience for all users. This multi-faceted approach allowed for comprehensive quality assurance across the platform's core aspects.

The following sections detail specific bugs encountered, the severity and priority of each issue, and steps to reproduce, providing the development team with actionable insights for resolution.

Accessibility Issues	Not tested	0%
Total Bugs	20	

Issue Types vs. Test Cases

Recommendation

To improve the user experience and functionality of the Crazylne website, it is essential to address the critical and high-priority bugs identified. Specifically:

1. Fix imminently all registration and Log in issues including third party interface issues.
2. Resolve "Buy the Look" Page Bug: Ensure that all items worn by the model are displayed and available for purchase. This fix will significantly enhance usability and drive higher customer engagement and sales.
3. Fix Content Loading in Magazine and Styling Tips Pages: Address missing images and broken content on these pages to provide a complete and engaging user experience, as these elements contribute to the website's brand value.
4. Correct 404 Errors in Blog Links: Eliminate these dead links to maintain site integrity and avoid user frustration.
5. Prioritize GUI and UX Improvements: Minor layout issues in sections such as Terms & Conditions should be refined to enhance readability and visual appeal, adding to overall site professionalism.

Conclusion

The testing phase has revealed several functional and GUI-related issues on the Crazylne website, impacting the user's ability to access and interact with key features effectively. Resolving these issues will ensure a seamless experience across all pages and reinforce brand reliability. Addressing critical functionality and usability issues will significantly improve customer satisfaction, likely resulting in better engagement and retention. Continued monitoring and iterative testing are recommended to maintain high standards as new updates and features are introduced.

Website's Test Tree

1. Home Page

Navigation Menu (NavBar)

- **Functionality**
- - Positive: Verify each menu link leads to the correct page.
- - Negative: Test clicking on disabled links (if any) and check for error handling.
- - Boundary: Test maximum and minimum link clicks in rapid succession.
- **UI**: Ensure the NavBar layout is consistent across pages and device sizes.
- **UX**: Test ease of navigation, clarity of menu options, and accessibility of links.
- **Accessibility**: Confirm each link is accessible via keyboard navigation and screen readers.
- **Internationalization and Localization**: Ensure menu items reflect language changes and right-to-left support (if relevant).

Banner Carousel

- - **Functionality**
- - Positive: Verify each banner image/link redirects to the correct page.
- - Negative: Test clicking quickly on carousel controls (next/previous) and check for stability.
- - Boundary: Test extreme values for auto-rotation (e.g., longest, shortest durations).
- - **UI**: Confirm image quality, dimensions, and alignment.
- - **UX**: Test for smooth transition animations and intuitiveness of controls.
- - **Accessibility**: Ensure controls are keyboard-accessible and images have alt text.
- - **Internationalization and Localization**: Confirm text on banners adjusts for selected language.

Featured Products Section

- Functionality
 - Positive: Verify each product link opens the correct product page.
 - CRUD: Test adding/removing featured items in/from cart.
- UI: Ensure consistent styling of product images, titles, and prices.
- UX: Test ease of scrolling or swiping through products.
- Accessibility: Confirm keyboard accessibility for product selection.
- Internationalization and Localization: Verify product names and currency format adjust based on language and region.

2. Log In and Registration

Log In

- Functionality
 - Positive: Test log-in with valid credentials.
 - Negative: Attempt log-in with invalid credentials (incorrect email format).
 - Negative: Attempt log-in with invalid credentials (incorrect password).
 - Boundary: Test maximum and minimum allowed password lengths.
- UI: Check field labels, input field alignment, and button positions.
- UX: Verify ease of finding and using log-in fields.
- Accessibility: Ensure form fields are screen reader-compatible.
- Interfaces: Test third-party logins (e.g., Facebook, Google).
- Internationalization and Localization: Ensure any error messages display in the selected language.

Registration

- Functionality
 - Positive: Register with valid information.
 - Negative: Register with missing mandatory fields.
 - Boundary: Test values for username, password, and email fields.
- CRUD: Check profile creation and modifications.
- UI: Confirm all form fields are visually aligned and correctly labeled.
- UX: Test ease of registration and clarity of error messages.
- Accessibility: Test form field navigation via keyboard.
- Internationalization and Localization: Verify that labels and placeholder text adjust based on language settings.

3. My Cart and Checkout

My Cart

- Functionality
 - Positive: Add and remove items in the cart.
 - Negative: Attempt to add out-of-stock items.
 - CRUD: Verify update, delete, and empty cart functionalities.
- UI: Confirm consistent design of product thumbnails, titles, and prices.
- UX: Check ease of updating quantities and proceeding to checkout.
- Accessibility: Ensure cart elements are keyboard-navigable and screen reader-friendly.
- Internationalization and Localization: Confirm currency and cart labels adjust based on selected locale.

Checkout

- Functionality
 - Positive: Complete checkout with valid payment information.
 - Negative: Attempt checkout with invalid payment information.
 - Boundary: Test boundary conditions for input fields (e.g., card number length).
- UI: Confirm layout of payment and shipping forms.
- UX: Check for user-friendly, clear checkout flow.
- Accessibility: Verify all fields are accessible via keyboard and properly labeled.
- Interfaces: Test third-party payment integrations (e.g., PayPal, credit card processors).
- Internationalization and Localization: Ensure all fields reflect regional currency, date, and number formats.

4. Product Pages and Product Search

Product Pages

- Functionality
 - Positive: Ensure product details load correctly.
 - CRUD: Test adding and removing products from cart.
- Boundary: Test minimum and maximum allowable purchase quantities.
- UI: Confirm layout consistency, image quality, and alignment.
- UX: Evaluate ease of adding products to cart and checking availability.
- Accessibility: Ensure product images have alt text and keyboard accessibility.
- Internationalization and Localization: Check product description translations.

Product Search

- Functionality
 - Positive: Verify accurate results for valid queries.
 - Negative: Test search with invalid or random inputs.
- UI: Confirm search bar placement and visibility.
- UX: Evaluate relevancy of search results and ease of use.
- Accessibility: Ensure search bar is accessible via keyboard and screen readers.
- Internationalization and Localization: Verify search functionality in different languages.

5. Essentials and Extras Pages

Product Listings

- Functionality
 - Positive: Verify links to individual product pages.
 - CRUD: Test adding and removing items in cart.
- UI: Confirm layout consistency for listings and filters.
- UX: Check ease of browsing, filtering, and sorting.
- Accessibility: Ensure filter and sort options are accessible.
- Internationalization and Localization: Confirm product information adjusts to selected language.

6. Blog and Magazine

Articles and Images

- Functionality
 - Positive: Verify each article opens correctly.
 - Negative: Test handling of broken images or links.
- UI: Confirm consistent styling and alignment.
- UX: Check readability and navigation ease.
- Accessibility: Verify image alt text and screen reader compatibility.
- Internationalization and Localization: Ensure language adjustments for text and images.

7. Footer Links

Social Media & website map Links

- Functionality
 - Positive: Ensure links open correct social media pages.
 - Negative: Test handling of broken links.
- UI: Verify icon layout and styling.
- Accessibility: Ensure links are keyboard accessible.
- Internationalization and Localization: Confirm that link descriptions (e.g., alt text) adjust per locale.

8. General tests for entire website

Performance Testing

- Measure page load times, especially for media-heavy sections (e.g., product images).
- Test load handling for multiple users accessing key areas simultaneously (e.g., checkout).

Compatibility Testing

- Test across multiple browsers (Chrome, Firefox, Safari, Edge)
- Verify responsiveness across devices (desktop, tablet, mobile)

Security Testing

- Ensure encrypted data transfer (HTTPS) for all sensitive data.

Disaster Recovery Testing

- Check system behavior during unexpected events (e.g., server outage).
- Verify recovery process and backup functionality, ensuring data integrity after recovery.

Bug List

- [CLBR-1]** Homepage UX issue --> Main header banner icons hide 'Categories' nav bar details when scrolling in page
- [CLBR-2]** UX/UI overall issue - 'Chat with rep' [אט עם נציג'ץ] icon bubble hides bottom page information
- [CLBR-3]** UX/UI overall issue - 'Chat with rep' [אט עם נציג'ץ] icon bubble --> If closed it reappears when navigating to different site section
- [CLBR-4]** UX/UI issue: Homepage bottom --> 'contact us' WhatsApp number not linked to application
- [CLBR-5]** Log in third party integration issue - Facebook Login Integration Fails
- [CLBR-6]** Failure to log in with correct registered email and correct password
- [CLBR-7]** GUI issue - 'דרושים' [Job Listings page] display only title without content on
- [CLBR-8]** UX/UI issue on 'Jobs' page -- nav bar is not displayed
- [CLBR-9]** GUI issue -- "Stores" section displays only title with no other content
- [CLBR-10]** UX/UI issue - Nav bar not displayed in 'Stores' page
- [CLBR-11]** GUI issue in 'Stores' page -- image/English title cut off and Hebrew title is displayed twice
- [CLBR-12]** GUI issue -- Terms & Conditions page text not properly formatted and mistakes in layout
- [CLBR-13]** GUI issue - No content displayed in Magazine category page URL:
<https://www.crazyline.com/stylingtips/?tip=26068>
- [CLBR-14]** GUI issue - No content displayed in Magazine category page URL:
<https://www.crazyline.com/stylingtips/?tip=26072>
- [CLBR-15]** GUI issue - No content displayed in Magazine category page URL:
<https://www.crazyline.com/stylingtips/?tip=26073>
- [CLBR-16]** GUI issue - No content displayed in Magazine category page URL:
<https://www.crazyline.com/stylingtips/?tip=26074>
- [CLBR-17]** GUI issue - No content displayed in Magazine category page URL:
<https://www.crazyline.com/stylingtips/?tip=26075>
- [CLBR-18]** Link issue - All item links in 'RED MUST HAVE' blog post page lead to '404' error 'this page does not exist'
- [CLBR-19]** "Buy the Look" page displays only one item instead of complete look for purchase
- [CLBR-20]** GUI issue - In Styling tips page [השראת המעצבת] image not loading
- [CLBR-21]** Low Performance Score (57) on Google PageSpeed Insights for overall website
- [CLBR-22]** JavaScript TypeError: element.prop is not a function in page-cache.min.js

Bug Report

[CLBR-1] Homepage UX issue --> Main header banner icons hide 'Categories' nav bar details when scrolling in page

Attachments:

The screenshot shows the homepage of crazyline.com. At the top, there's a pink header bar with the website's name. Below it is a black navigation bar containing several items: 'BUY THE LOOK', 'מגנין', 'הנה', 'כרטיס מנהנה', 'השרות המעצבת', 'שירות לקוחות', 'אודות', 'ביסיק', 'לבת', 'בשמם', 'SUPER SALE', 'הקלוקניה', 'NEW', and a search icon. Three small icons (a bag, a heart, and a location pin) are overlaid on the left side of this bar. A red arrow points to the bag icon, and another red arrow points to the location pin icon. In the bottom right corner of the page, there's a circular badge with the number '1'.

Severity:	Major

Description

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. scroll down in Homepage

Expected Result:

Main header banner icons will stay at top of the page with original black background above 'categories' nav bar not show at all.

Actual Result:

Icons show on top of 'categories' nav bar titles hiding titles and denying the option to click on the hidden titles links.

[CLBR-2] UX/UI overall issue - 'Chat with rep' [אט עם נציג'צ] icon bubble hides bottom page information

Attachments:

The screenshot shows a web browser window displaying a shopping website. At the bottom left, there is a red-highlighted 'Chat with rep' icon bubble containing a female profile picture and text. A large red arrow points from this bubble towards the right side of the screen, where several product cards are visible. To the right of the products, there is a sidebar with various links and sections like 'שירות לקוחות' (Customer Service), 'מוצרים' (Products), and 'שירות לקוחות' (Customer Service) again. The overall layout is cluttered due to the overlapping of the chat bubble.

Severity:	Medium	

Description

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. scroll down to bottom of page

Expected Result:

'Chat' icon bubble to be visible and integrated in page so it doesn't hide information [text images]

Actual Result:

'Chat' icon bubble hides information, hides the crazyline facebook page link button.

[CLBR-3] **UX/UI overall issue - 'Chat with rep' [אַט עֶמֶן צִיְגָן] icon bubble --> If closed it reappears when navigating to different site section** Created: 31/Oct/24 Updated: 31/Oct/24

The screenshots show a sequence of interactions on the Crazy Line website:

- Screenshot 1:** A red callout bubble with the text "hover on bubble & click 'x' to close it" points to a close button on a pink speech bubble containing a woman icon. The main content shows a price drop from 169.90 to 99.90. A large red circle labeled "1" is in the top right corner.
- Screenshot 2:** A red arrow points to the "NEW" button in the top navigation bar. A red circle labeled "2" is in the top right corner. A red callout bubble with the text "bubble close" points to the close button on the same pink speech bubble as in Screenshot 1.
- Screenshot 3:** A red box highlights the URL "crazyline.com/new" in the browser address bar. A red circle labeled "3" is in the top right corner. A red callout bubble with the text "bubble reappears" points to the pink speech bubble. The main content shows the same price drop, and a "NEW" badge is visible next to the price. A red arrow points to the "NEW" button in the top navigation bar.

Severity:	Medium

Description

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. hover on 'chat' bubble
3. click on 'X' mark to close bubble
4. navigate to any page in Crazyline website → example: click on NEW

Expected Result:

bubble will remain closed

Actual Result:

bubble reappears and remains in fixed spot when scrolling.

This issue occurs on all pages in website

---------------------	--

Severity:	Major

Description

Preconditions

Test User has created an account on the website successfully with a valid email address and custom simple password.

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. click on 'Log in' [התחבר]
3. enter the correct registered valid email in email field
4. enter the correct password in password field
5. click 'connect' [התחבר]

Expected Result:

- User is successfully authenticated, the website redirects the user to their account dashboard or back to homepage
- An indication of successful login will be displayed → 'welcome user' / username will appear next to cart icon etc.

Actual Result:

Error message is displayed → 'Email or password failure'

[CLBR-7] GUI issue - 'דרושים' [Job Listings page] display only title without content on

The screenshot shows a web browser window with a tab titled 'crazyline.com'. The main content area displays a job listing with several sections like 'GET SOME MORE', 'EMPLOYEE BENEFITS', and 'EMPLOYEE BENEFITS'. A red circle with the number '3' is positioned at the top left of the browser window, indicating the presence of attachments. A red arrow points from a red circle with the number '1' to a small inset image of a mobile phone screen. The mobile phone screen displays a Hebrew interface with text such as 'הרי ליין', 'אנו מודים לך', 'תודה', and 'בנוסף'.

	
Severity:	Medium

Description

Description:

In the "Jobs" section of the website, job title is displayed; however, no additional content (such as job descriptions, requirements, or application instructions) is visible.

The page is incomplete and unusable for applicants.

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. Scroll down to footer menu
3. Click on 'דרושים' ["Jobs" or "Careers"] section from the footer menu.
4. Scroll through the job listings to view each listing's content.

Expected Result:

Page will display job listings with full information, including titles, job description, requirements, and application instructions.

Actual Result:

Only the page title job title – 'דרושים' – is displayed with no other content available

The screenshot shows a web browser window with a dark theme. At the top, there's a navigation bar with various links like 'BY THE LOOK', 'SEARCH', 'SEARCH RESULTS', 'SUGGESTIONS', 'TOP 100', 'TOP 1000', 'TOP 10000', 'TOP 100000', 'TOP 1000000', 'TOP 10000000', 'TOP 100000000', 'TOP 1000000000', and 'TOP 10000000000'. Below the navigation bar, there's a main content area with some text and a sidebar on the right. The sidebar has a dark background with white text. In the top right corner of the sidebar, there's a button labeled 'חדש' (New). A red arrow points to this button, and a large red circle with the number 1 is overlaid on the screenshot, indicating the specific issue being reported.

<p>Severity: Major</p>

Description

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. Scroll down to footer menu
3. Click on 'דרושים' ["Jobs" or "Careers"] section from the footer menu.

Expected Result:

Nav bar is displayed to allow user to navigate to other sections of the website

Actual Result:

Nav bar is not displayed

[CLBR-9] GUI issue -- "Stores" section displays only title with no other content

	 <p>No content</p> 
Severity:	Medium

Description

Description:

When navigating to the "Stores" section only the title "Stores" is displayed on top of an image. No additional content such as a list of store locations, map, or relevant details, is loaded or visible to the user.

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. scroll down to footer menu section
3. click on 'Stores' [סניפים]

Expected Result:

The "Stores" section should display content, such as:

- A list of available store locations.
- A map with pins or markers for store locations.
- Address, hours of operation, and contact details for each store.

Actual Result:

Only the title "Stores" is displayed, with no additional content or store information.

The screenshot shows a web browser window with a dark theme. At the top, there is a navigation bar with various icons and links. A red circle with the number '1' is overlaid on the top right corner of the browser window. Inside the browser window, there is a page with a dark background. On the right side of the page, there is a vertical sidebar with Hebrew text. A red arrow points from the bottom right towards this sidebar, highlighting a specific section of text.

הכף אותו שלים עבו המוץ.

11. בון אפקט החגיגי, ואנו מטעמו לדרוש את נוכחות של בעל כרטיס האשראי בעת מסיבות המופץ, / או האצנת תעוזות והות של בעל כרטיס האשראי / או חותמתה של בעל כרטיס האשראי עד כי ישוב כנני מסיטת החזב.

12. בכל קupon לבוניה להזמין לאור שהמוצר של זה מכבר, כפוף הבטול לכך שהליך ייזור את המוצר באירועו המקורית שלם / או לא פגעה / או נזק / או פגם / או קליקל מכל מין וoxic לאות מחנות הרשות.

13. משמעות הודהה : ניתן דרכישה בחניות". דוגמם שאלו במלאי במחסני החברה, אך קיימים במלאי הרשות לא ימכרו באתר אלא בחניות בלבד.

The screenshot shows a browser window with the URL crazyline.com/takanon. The page content discusses common mistakes in Hebrew spacing, such as using a space before the final punctuation mark in a sentence. A red box highlights the title 'spacing mistakes'. Another red box highlights a section titled 'נקודות עיקריות' (Key Points) which includes a phone number and operating hours. A large red arrow points from the right side of the page towards the bottom right corner, where there is a sidebar with a woman's profile picture and the text 'אודות ופרטיות' (About and Details). The overall layout is clean with a white background and black text.

Severity: Low

Description

Description:

In the Terms & Conditions page the text is not properly formatted and contains layout errors such as double spaces.

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. scroll down to footer menu section
3. click on 'Terms&Conditions' [לינק]

Expected Result:

The text displayed on the page will be properly professionally formatted to allow user clear inspections of the terms and conditions

Actual Result:

The text displayed on the page is not properly formatted and there are several layout mistakes

Attachments:	
--------------	--

Severity:

Critical

Description

Description:

In the "Buy the Look" page, which is intended to allow users to purchase all items worn by the model in a single view, clicking on the model image opens a page that displays only one item instead of the complete look. For example, if the model is shown wearing pants, a shirt, a jacket, and a bag, clicking the image opens a page displaying only the jacket item, with the other items missing.

Steps to Reproduce:

1. Navigate to the "Buy the Look" in URL: <https://www.crazyline.com/buy-the-look> → In Homepage NavBar click on 'BUY THE LOOK' →
2. Scroll down & click on any model image that should display multiple items for purchase.
3. Observe that only one item (e.g., jacket) is available for purchase, instead of all items in the look.

Expected Result:

The "Look" page should display all items worn by the model (e.g., pants, shirt, jacket, bag ecc.) with the option for the user to select size/color ecc. and to add each item to the cart.

Actual Result:

Only one item from the look is displayed on the "Look" page, and the other items worn by the model are not shown or available for purchase.

Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Google Chrome: Version 129.0.6668.90 (Official Build) (64-bit)		

Attachments:

Severity:

Critical

Description

Steps to Reproduce:

1. Open URL: <https://www.crazyline.com/>
2. Open Google PageSpeed Insights (<https://developers.google.com/speed/pagespeed/insights>).
3. Enter the page URL and analyze the results.
4. Observe the performance score and identified issues.

Expected Result:

The site should achieve a performance score of 80 or higher on Google PageSpeed Insights to ensure optimal user experience and meet performance benchmarks.

Actual Result:

The page/site currently scores 57, which is below acceptable performance standards, leading to slow load times and potential user experience issues.

Performance Issues Identified:

Based on the PageSpeed Insights report, the following areas require optimization:

- **Reduce Unused JavaScript:** Identify and remove any non-essential JavaScript that slows down loading times.
- **Eliminate Render-Blocking Resources:** Defer or asynchronously load critical CSS and JavaScript to improve initial load.
- **Optimize Images:** Compress and resize images to reduce their load on the site.
- **Leverage Browser Caching:** Extend caching for static resources to reduce load time for repeat visitors.
- **Minimize Main-Thread Work:** Optimize JavaScript execution and reduce the time the main thread is blocked.

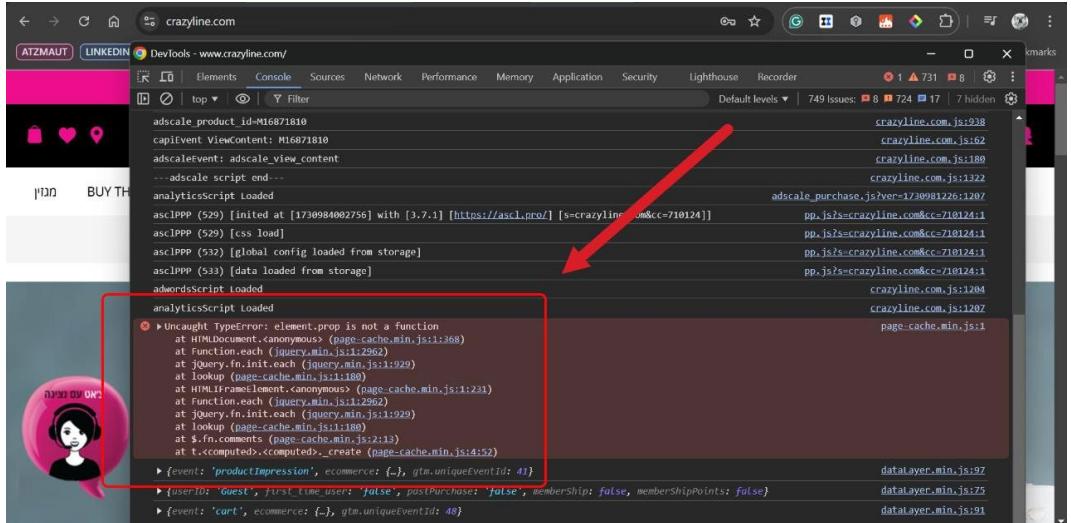

[CLBR-22] JavaScript TypeError: element.prop is not a function in page-cache.min.js

Created: 07/Nov/24 Updated: 07/Nov/24

Status:	To Do
Project:	crazy line bug report
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	Medium
Reporter:	Yinon	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Google Chrome: Version 129.0.6668.90 (Official Build) (64-bit)		

Attachments:

Severity:	Critical
------------------	----------

Description

Description:

A `TypeError` occurs in `page-cache.min.js`, where `element.prop` is called on an invalid element, resulting in the error: `Uncaught TypeError: element.prop is not a function`. This error suggests that `element` is not a `jQuery` object or a supported DOM element, which prevents the script from executing correctly. The error may impact the page's functionality, particularly any features relying on caching or dynamically handling elements.

Steps to Reproduce:

1. Open the console in Chrome DevTools).
2. Navigate to <https://www.crazyline.com/>
3. Observe the error in the console log, which should appear as:
`Uncaught TypeError: element.prop is not a function at HTMLDocument.<anonymous> (page-cache.min.js:1:368)`

Expected Result:

JavaScript should execute without errors, and all page functionalities should work as intended.

Actual Result:

The `TypeError` prevents certain functions in `page-cache.min.js` from executing. This may impact element caching and/or interactions with specific page elements.

Error Details (from Console Log):

```
Uncaught TypeError: element.prop is not a function at HTMLDocument.<anonymous> (page-cache.min.js:1:368) at Function.each (jquery.min.js:1:2962) at jQuery.fn.init.each (jquery.min.js:1:929) at lookup (page-cache.min.js:1:180) at HTMLIFrameElement.<anonymous> (page-cache.min.js:1:231) at Function.each (jquery.min.js:1:2962) at jQuery.fn.init.each (jquery.min.js:1:929) at lookup (page-cache.min.js:1:180) at $.fn.comments (page-cache.min.js:2:13) at t.<computed>.<computed>._create (page-cache.min.js:4:52)
```
